

FLEET MAINTENANCE STRATEGY THROUGH EXECUTION.

FMC360 helps transit agencies, public fleets, and private operators turn fleet condition, maintenance data, compliance requirements, and operating pressure into a practical execution plan.

// CORE CAPABILITIES

- + Operational recovery: availability, backlogs, shop flow, staffing, parts, vendors, and recovery governance
- + Maintenance systems: PM, compliance, CMMS, VMRS, quality, parts controls, KPIs, and dashboards
- + Fleet lifecycle strategy: useful life, replacement, overhaul, specifications, inspection, and acceptance
- + Electrification readiness: fleet and facility readiness, electrical safety, training, tooling, and rollout
- + Inspection intelligence: structured vehicle evidence converted into leadership-level priorities
- + Executive analytics: condition, availability, cost, risk, and performance reporting
- + Field execution: inspections, mobile maintenance, and surge capacity through Traveling Wrenches

// WHY FMC360

- + Independent perspective grounded in fleet operations
- + Data with context for defensible leadership decisions
- + Plans built to execute within real operating constraints
- + National support across diesel, CNG, hybrid, and battery-electric fleets

// EXECUTIVE LEADERSHIP

Jason Hatfield, CDM/E

Fleet maintenance, strategy, and capital-planning executive with shop-floor through enterprise leadership experience. Certified Director of Maintenance/Equipment (NATMI) and Certified VMRS Specialist (American Trucking Associations).
